

DIGITAL PHOTOGRAPHY

Our May photo shoot at Levens Hall gardens produced lots of interesting images in spite of the flat lighting conditions. We enjoyed the creativity of members when we viewed the results at our June meeting.

The group resumes on Thursday 17 September when we are going to have a look at some features of photo processing software, including the question of how to reduce the size of digital photo files to make them better for emailing or other purposes/reasons, as well as viewing special images captured during this very hot, dry summer.
